EXAMINER
----------

INGBERG, TODD D

ART UNIT	PAPER NUMBER
----------	--------------

2193

DATE MAILED: 06/23/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

10/660,034

Applicant(s)

BATES ET AL.

Examiner

Todd Ingberg

Art Unit

2193

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 11 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-21 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 9/11/2003 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### **DETAILED ACTION**

Claims 1 – 21 have been examined.

#### ***Drawings***

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### ***Specification***

2. The Title and Abstract are under objection because legal words like "method", "system" and "Computer program product" should not be present.

#### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1 - 21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The current focus of the Patent Office in regard to statutory inventions under 35 U.S.C. § 101 for method claims and claims that recite a judicial exception (software) is that the claimed invention recite a practical application. Practical application can be provided by a physical transformation or a useful, concrete and tangible result. No physical transformation is recited and additionally, the final result of the claim is

Art Unit: 2193

to debugging and has display capabilities which is not a tangible result because not results are displayed, updated or written to a computer readable medium. The following link on the World Wide Web is for the United States Patent And Trademark Office (USPTO) policy on 35 U.S.C. §101.

[http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/guidelines101\\_20051026.pdf](http://www.uspto.gov/web/offices/pac/dapp/opla/preognotice/guidelines101_20051026.pdf)

For Example, Claim 1 has the ability to display but is not claiming displaying the result.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1- 21 are rejected under 35 U.S.C. 102(b) as being anticipated by “How Debuggers Work”, by Jonathan B. Rosenberg published 1996 (**Dbug**).

#### **Claim 1**

**Dbug** anticipates an apparatus for implementing enhanced graphical user interface functions in a graphical debugger (**Dbug**, page 22 – 32, Figures show enhanced GUI) comprising:

a user interface for operatively controlling a graphical user interface (**Dbug**, pages 22-32, the ability to perform operations such as disassembly view on page 29) ;

a loadmap display manager coupled to said user interface for implementing a loadmap function (**Dbug**, page 236, anticipates debugging object oriented code – Page 2 of Applicant’s Specification loadmap is Admitted prior art as part of object oriented debugging and **Dbug**, page 81);

said user interface responsive to said loadmap display manager for displaying a program loadmap (**Dbug**, page 94, JAVA debugging);

a custom record display manager coupled to said user interface receiving user inputs and implementing a custom record display function (**Dbug**, page 22 – 32, Figures show enhanced GUI);

said user interface responsive to said custom record display manager for displaying user selected customized records (**Dbug**, pages 22-32, the ability to perform operations such as Inspector on page 32).

**Claim 2**

Apparatus for implementing enhanced graphical user interface functions as recited in claim 1 further includes a debugger server and wherein said loadmap display manager operatively controls said debugger server for implementing said loadmap function. (Dbug, pages 195 – top of 198, remote debugging - page 197 for server specifically).

**Claim 3**

Apparatus for implementing enhanced graphical user interface functions as recited in claim 2 wherein said load map function includes debugger means for reading debug data for a program under debug (As per claim 1); examining the program debug data, for generating a list of each source and disassembly file contained in the program under debug (as per claim 1 – disassembly example), **and for generating a list of each object** ( As per claim 1 – JAVA example) **or** archive program bound to the program under debug at run time to generate said program loadmap for display.

**Examiner Note**

Examiner notes the OR in the limitations and has selected the bolded limitation.

**Claim 4**

Apparatus for implementing enhanced graphical user interface functions as recited in claim 3 wherein said load map function further includes debugger means for identifying program load and unload events, and for dynamically updating said program loadmap for display as loadmap information changes responsive to program load and unload events (As per claim 1) ; whereby said program loadmap enables setting a breakpoint within a user selected address range for one instance of a source file, without setting the breakpoint in other instances of the source file (Dbug, Multithreaded Debugging in Chapter 9. And isolating specific threads on page 182 and Breakpointing on page 184)

**Claim 5**

Apparatus for implementing enhanced graphical user interface functions as recited in claim 2 wherein said custom record display manager operatively controls said debugger server for implementing said custom record display function (as per claims 1 and 2); and said custom record display function includes debugger means for identifying a user selected variable (Dbug, page 32, Inspector – single variable), and user selected fields of the variable to be displayed (Dbug, page 32, Inspector – multiple as in display)

**Claim 6**

Apparatus for implementing enhanced graphical user interface functions as recited in claim 5 wherein said custom record display function further includes debugger means for identifying a user selected all variables of this type to be customized (Dbug, page 130, watchpoints), for creating a custom record with the user selected fields and for adding said created custom record to a custom type list for displaying user selected customized records for all variables of this type only with the user selected fields (Dbug, Chapter 6, page 108 – 110).

Art Unit: 2193

**Claim 7**

Apparatus for implementing enhanced graphical user interface functions as recited in claim 5 wherein said custom record display function further includes debugger means for creating a custom record with the user selected fields and for adding said created custom record to a variables list for displaying the variable only with the user selected fields. As per claim 5.

**Claim 8**

A debugger computer program product for implementing enhanced graphical user interface functions in a computer system, said debugger computer program product including instructions executed by the computer system to cause the computer system to perform the steps of:

reading debug data for a program under debug;  
examining said program debug data, generating a list of each source (Dbug, pages 12 – 14) and disassembly file contained in the program under debug (Dbug, pages 29 and 146), and **generating a list of each object** (As per claim 3) **or** archive program bound to the program under debug at run time to generate said program loadmap for display; and displaying said generated program loadmap on a graphical user interface ( as Per claim 1).

**Examiner Note**

Examiner notes the OR in the limitations and has selected the bolded limitation.

**Claim 9**

A debugger computer program product-for implementing enhanced graphical user interface functions as recited in claim 8 includes the step of identifying program load and unload events (Dbug, page 121, Step-Into), and dynamically updating said program loadmap for display as loadmap information changes responsive to program load and unload events (Dbug, update of display with Step operations is inherent and required).

**Claim 10**

A debugger computer program product for implementing enhanced graphical user interface functions as recited in claim 9 wherein the step of identifying program load and unload events includes the steps of setting breakpoints at program load and unload entry points in the program under debug (Dbug, page 108, bullet 7); and when debugging said program, identifying an unload breakpoint; and removing all information for an archive program being unloaded from said program loadmap to provide a current program loadmap, and displaying said current program loadmap. (Dbug, page 97, module unloaded).

**Claim 11**

A debugger computer program product for implementing enhanced graphical user interface functions as recited in claim 8 includes the step of identifying a user selected variable and identifying user selected fields of the variable to be displayed, and creating a custom record with the user selected fields. As per claim 5.

**Claim 12**

A debugger computer program product for implementing enhanced graphical user interface functions as recited in claim 11 includes the step responsive to a user selection of all variables of

Art Unit: 2193

this type to be customized, adding said created custom record to a custom type list for displaying user selected customized records for all variables of this type only with the user selected fields. As per claim 6.

**Claim 13**

A debugger computer program product for implementing enhanced graphical user interface functions as recited in claim 11 includes the step adding said created custom record to a variables list for displaying the variable only with the user selected fields. As per claim 7.

**Claim 14**

A debugger computer program product for implementing enhanced graphical user interface functions in a computer system, said debugger computer program product including instructions executed by the computer system to cause the computer system to perform the steps of:

- identifying a user selected variable and identifying user selected fields of the variable to be displayed,
- creating a custom record with the user selected fields; and
- displaying the variable only with the user selected fields. As per claims 1 and 6.

**Claim 15**

A debugger computer program product for implementing enhanced graphical user interface functions as recited in claim 14 wherein the step of displaying the variable only with the user selected fields includes the step adding said created custom record to a variables list for displaying the variable only with the user selected fields. As per claim 3.

**Claim 16**

A debugger computer program product for implementing enhanced graphical user interface functions as recited in claim 14 includes the step of identifying a user selection of all variables of this type to be customized, adding said created custom record to a custom type list for displaying user selected customized records for all variables of this type only with the user selected fields. As per claim 6.

**Claim 17**

A method for implementing enhanced graphical user interface functions in a graphical debugger comprising the steps of:

- utilizing a loadmap display manager for implementing a loadmap function and generating a program loadmap for a program under debug;
- displaying said generated program loadmap responsive to said loadmap function;
- utilizing a custom record display manager for receiving user inputs and implementing a custom record display function;
- displaying user selected customized records responsive to said custom record display function. As per claim 1.

**Claim 18**

Art Unit: 2193

A method for implementing enhanced graphical user interface functions in a graphical debugger as recited in claim 17 wherein the step of utilizing a loadmap display manager for implementing a loadmap function and generating a program loadmap for a program under debug includes the steps of reading debug data for a program under debug; examining said program debug data, generating a list of each source and disassembly file contained in the program under debug, and **generating a list of each object OR** archive program bound to the program under debug at run time to generate said program loadmap for display; and displaying said generated program loadmap on a debugger graphical user interface. As per claim 1.

**Examiner Note**

Examiner notes the OR in the limitations and has selected the bolded limitation.

**Claim 19**

A method for implementing enhanced graphical user interface functions in a graphical debugger as recited in claim 18 includes the steps of identifying program load and unload events, dynamically updating said program loadmap and displaying said updated loadmap responsive to identified program load and unload events. As per claim 10.

**Claim 20**

A method for implementing enhanced graphical user interface functions in a graphical debugger as recited in claim 17 wherein the step of utilizing a custom record display manager for receiving user inputs and implementing a custom record display function includes the steps of identifying a user selected variable and identifying user selected fields of the variable to be displayed, creating a custom record with the user selected fields; and displaying the variable only with the user selected fields. As per claim 6.

**Claim 21**

A method for implementing enhanced graphical user interface functions in a graphical debugger as recited in claim 20 includes the steps of identifying a user selection of all variables of this type to be customized, adding said created custom record to a custom type list for displaying user selected customized records for all variables of this type only with the user selected fields. As per claim 7.

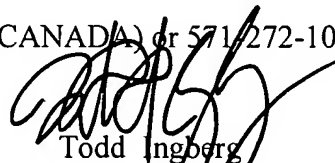

***Correspondence Information***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Todd Ingberg whose telephone number is (571) 272-3723. The examiner can normally be reached on during the work week..

Art Unit: 2193

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kakali Chaki can be reached on (571) 272-3719. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
